

CHAPTER 19
Plumbing
(Rep. & recr. #28-88)

19.06 Inspection of Installations

(1) All plumbing systems or installations within the City and those connecting with the City water or sewerage system beyond the boundaries are subject to inspection as required in this section.

(2) (Am. #53-93) Whenever any work is ready for inspection, the Plumbing Inspector shall be notified by the plumber in charge or the person to whom the permit was issued, specifying the street and number when possible, and the permit number under which the work is being done. Unless otherwise permitted by the Inspector, all work, either plumbing, water supply piping, house sewers or drains, shall be left uncovered for examination until examined and approved by the Inspector. The plumber in charge shall make such arrangements as will enable the Inspector to reach all parts of the building readily, and shall have present the proper apparatus and appliances for making the test and shall furnish all materials and shall perform all labor in making such tests as required by the Plumbing Inspector to make the necessary and proper inspection.

(3) Failure of a master plumber to report for inspection all work done by him other than repair work is a violation of this chapter.
